

Join us as a volunteer at the ZaHRAda Montessori School

We believe that children take responsibility for their own learning, while teachers serve as guides on their educational journey. Our approach is based on hands-on experiences and an open, safe environment.

You will become part of the international ESC team and experience volunteering within an inspiring network of innovative schools and kindergartens in the Tišnov region (Czech Republic), where we approach learning differently.

We are a community-supported school built on the principles of Montessori pedagogy. We combine these with modern approaches such as PBIS, a formative approach, and nonviolent communication.

We collaborate with other innovative schools throughout the Czech Republic.

We create an environment where children discover their potential. We believe that in education, the most important thing is the willingness and ability to learn. We are a school where everyone learns to the fullest and with enthusiasm.

You will become part of the international ESC team and experience volunteering within an inspiring network of innovative schools and kindergartens in the Tišnov region (Czech Republic), where we approach learning differently.
